

Perl While Loop

คำสั่งวน loop ของภาษา Perl โดยใช้ while Loop และใช้ jdoodle.com ในการ run ทดสอบ

```
#!/usr/bin/perl
```

```
use warnings;
```

```
use strict;
```

```
my $counter = 10;
```

```
while($counter > 0){
```

```
    print("$counter\n");
```

```
    # count down
```

```
    $counter--;
```

```
    # pause program for 1 second
```

```
    sleep(1);
```

```
    if($counter == 0){
```

```
        print("SAMPAN SU!\n");
```

```
    }
```

```
}
```
