

VB.NET FOR LOOP

คำสั่งวน loop ของภาษา VB.NET โดยใช้ For Loop และใช้ jdoodle.com ในการ run ทดสอบ

```
Module Module1
```

```
    Sub Main()
```

```
        ' Outer for-loop.
```

```
        For value As Integer = 0 To 3
```

```
            Console.WriteLine("OUTER LOOP: {0}", value)
```

```
            ' Inner for-loop.
```

```
            For value2 As Integer = 5 To 0 Step -1
```

```
                Console.WriteLine("INNER LOOP: {0}", value2)
```

```
                If value2 = 3 Then
```

```
                    ' Exit for exits the enclosing loop, not an outer loop.
```

```
                    Console.WriteLine("EXIT INNER FOR")
```

```
                    Exit For
```

```
                End If
```

```
            Next
```

```
        Next
```

```
    End Sub
```

```
End Module
```
