VB.NET FOR LOOP

คำสั่งวน loop ของภาษา VB.NET โดยใช้ For Loop และใช้ jdoodle.com ในการ run ทดสอบ

https://www.jdoodle.com/compile-vb-dot-net-online/

```vbnet
Module Module1

    Sub Main()

        ' Outer for-loop.

        For value As Integer = 0 To 3

            Console.WriteLine("OUTER LOOP: {0}", value)

            ' Inner for-loop.

            For value2 As Integer = 5 To 0 Step -1

                Console.WriteLine("INNER LOOP: {0}", value2)

                If value2 = 3 Then

                    ' Exit for exits the enclosing loop, not an outer loop.

                    Console.WriteLine("EXIT INNER FOR")

                    Exit For

                End If

            Next

        Next

    End Sub

End Module
```
